DETAILED ACTION

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 22, 21 and 23, drawn to an isolated polynucleotide encoding a polypeptide containing the amino acid sequence of SEQ ID NO: 2, classified in class 435, subclass **252.32**.
- II. Claims 8-19, drawn to a fermentation process for the preparation of an L-amino acid, classified in class 435, subclass **106**.
- III. Claim 20, drawn to a process for the production of DNA of genes which develop an action corresponding to the *opcA* gene comprising the polymerase chain reaction, classified in class 435, subclass **91.2**

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II or III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the product of Group I can be used to synthesize or mutate the encoded polypeptide.

The methods of Groups II and III are independent as they comprise different steps, utilize different products and produce different results.

Because these inventions are distinct for the reasons given above and the search required for Group I-III are not coextensive, restriction for examination purposes as indicated is proper. *"For purposes of the initial requirement, a serious burden on the examiner may be prima facie shown if the examiner shows by appropriate explanation either separate classification, separate status in the art, or a different field of search as defined in MPEP 808.02." (see MPEP 803).*

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard G Hutson whose telephone number is (703) 308-0066. The examiner can normally be reached on 7:30 am to 4:00 pm, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapu Achutamurthy can be reached on (703) 308-3804. The fax phone numbers for the organization where this application or proceeding is assigned
